

Building on what we already have

The Muriel Campbell Subcommittee means so much to me as a woman in debate, and that is why I'd be honoured to be elected your next chairperson.

I'd love to get involved in the wider university community and invite other societies such as the walkie talkie girlies and women in STEM for collaborative debates.

I'd also been keen to work with our Schools Convenor to organise an all-girls school debating competition. It would be a wonderful opportunity to encourage more young women to get involved with debating and building their confidence

I'd also love to work with our Events Officer to organise some feminist lit talks and discussion panels for the conversations that otherwise may not happen

Finally, I'd love to introduce some subcommittee merchandise, nothing big or fancy, just something to give us a stronger identity.

In a world where representation is increasingly important, it would be my honour to represent you all as chairperson for the Muriel Campbell Subcommittee
